Mandatory Training

A division of the TPS Group of Companies

The Occupational Health and Safety Awareness and Training Regulation (O. Reg. 297/13) requires employers to ensure that workers on construction projects successfully complete a working at heights training program if they may use specified methods of fall protection.

The Working at Heights program must be approved by the Chief Prevention Officer (CPO) and must be delivered by a CPO-approved training provider.

The Working at Heights program trains on the following categories:

THEORY MODULE

- Rights and Responsibilities
- Identification of the Hazards of Working at Heights
- Eliminating or Controlling the Hazards of Working at Heights
- Warning Methods and Physical Barriers
- Ladders and Similar Equipment
- Personal Fall Protection Equipment
- You must achieve an 80% or higher on the written evaluation in order to successfully complete the course.

PRACTICAL MODULE

- Rights and Responsibilities
- Identification of the Hazards of Working at Heights
- Eliminating or Controlling the Hazards of Working at Heights
- Warning Methods and Physical Barriers
- Ladders and Similar Equipment
- Personal Fall Protection Equipment
- You must achieve an 80% or higher on the written evaluation in order to successfully complete the course.
